## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 to 7 and 9 to 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Rossborough (US 5,358,550). Rossborough discloses a method comprising injecting calcium nitrate (col.2, line 34) and a liquid gas producing compound(col.3, lines 28-30) in combination with magnesium (col.4, line 28) and a carrier gas such as nitrogen (col.9, line 31) which anticipates the claimed method .

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 to 7 and 9 to 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwer (US 4,447,265) in view of Rossborough (US 5,358,550)

Schwer discloses a composition for foaming slag in an electric arc steelmaking process comprising a carbon source and a source of calcium oxide but does not disclose calcium nitrate as a calcium source but Rossborough discloses a desulfurization agent comprising calcium nitrate (col. 2, lines 28 to 35) it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide calcium nitrate as a calcium source in the Schwer composition because Schwer desires a foamed slag which effects a flushing action which removes sulfur and Rossborough disclose tha calcium nitrate will function as a desulfurizing agent.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 provides for the use of calcium nitrate, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 1 to 7 and 9 to 11 are indefinite because the steps of the process are not clearly recited but method claims should at least recite positive active steps so that the claims will make clear what subject matter the claims encompass.

In Claim 2 the examples, "such as air ..." are indefinite.

In Claim 3 the expression "pre-fused granules" is indefinite.

Claims 4 and 5 recite the limitation "the melt" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 is incomplete since it is unclear whether the step of adding calcium nitrate is ever carried out.

In Claim 7 it is unclear how the gases are used.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 8 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35

U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).
